DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 16 of U.S. Patent No. 6,780,955. Although the conflicting claims are not identical, they are not patentably distinct from each other because the use of the alkoxysiloxanes as crosslinkers in the polymers is suggested within the claimed process in the patent.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1713

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Berg et al. US 5,895,794.

5. The generically claimed alkoxysiloxane and polymer is clearly anticipated by the examples of this patent.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

8. Claims 2-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over any one of Berg et al. US 5,895,794 or Mack et al. US 6,395,858 or Edelmann et al. US 6,133,466 or EP 0 518 057 A1.

9. Berg et al. shows alkoxysiloxanes which are seen to render obvious the claimed compounds at column 10, lines 1+. The use of these compounds as crosslinkers in the claimed polymers is suggested at columns 5 and 6.

Art Unit: 1713

10. Mack et al. Edelman et al. show the claimed alkoxysiloxanes in the abstracts.

The use of these compounds in the claimed polymers is suggested at column 5 lines 25+ in Edelman et al. and column 6 lines 14+ of Mack et al.

11. EP 0 518 057 A1 shows the claimed alkoxysiloxanes at page 2 lines 1+. The use of the compounds in the claimed polymers is rendered obvious by the abstract where it appears to suggest the use of the compounds in "thermoplastische Polyolefine."

12. The differences between the cited art and the instantly claimed invention is that the art does not provide an example of the claimed compounds in the combination as claimed. The claims are obvious from the art because the claimed compounds are shown and their use in the claimed polymers is suggested. One of ordinary skill would find it prima facie obvious to use the alkoxysiloxanes in the polymers as claimed.
